

## Mike Garson, M-Powered.

Virtuoso keyboard maverick Mike Garson joined forces with the legendary David Bowie on the 1973 "Aladdin Sane" album, and the rest is history. Also a talented solo artist, this powerhouse composer/player is constantly pushing the boundaries of creativity. As you might expect, Garson is as discriminating about his gear as he is about his music. M-Audio TAMPA preamps ensure that his piano recordings are pristine. He also relies on his M-Audio Delta 1010, Studiophile BX8 reference monitors, and Ableton Live as important parts of his studio setup. And M-Audio's Oxygen8 and other mobile solutions keep the music moving on the road with Bowie. You won't find an artist more selective about his gear than Mike Garson—and you won't find him settling for less than M-Audio quality.

Where do you want to take your music?
